## GENERAL CHARACTERISTICS, MODEL OB2424E AND OB2444E

These new serial of examination and massage couches are available with electrical height adjustment, mechanical or electrical backrest adjustment and an electrical Trendelenburg adjustment.

Standard finish of the frame: aluminum color coated (RAL9007).

The frame beneath is fitted with a bottom platform, with a solid welded castor fixation on the 4 corners. On top of that 2 esthetic columns in which the motors are situated.

The reclining surface consists out of 2 parts, on both sides with rounded corners.

Total size of the reclining surface: 70 x 203 cm, subdivided in a headrest of 53,5 and a sitting-/lying part of 149,5 cm.

Fitted with a 60 mm thick Polyether, covered with a high-grade stark artificial leather (standard in the colors: black or dark blue).

The electrical height adjustment from ca. 60 up to 100 cm can be operated by the switchboard.

A paper roll holder at the head part.

Mounted on 4 easy moving design castors, Ø 125 mm, with a brake system divided in two parts. The center of the castors are of Polyamide (color: off-white) and a Polyurethane tread. Both the castor bearing as the swiveling bearing is fitted with a precision bearing.
